## Foreword

Friend of the Earth is an international certification scheme for sustainable agriculture and breeding. It was developed on the basis of the SAFA (Sustainability Assessment of Food and Agriculture systems) guidelines set by the FAO (United Nations Food and Agriculture Organisation) and its principles are based on the safeguarding and protection of the entire ecosystem within which certified companies carry out their activities.

Requirements are classified as Essential, Important or Recommendations, according to their level of importance.

**Essential Requirements:** The company under audit shall be 100% compliant with essential requirements to be recommended for certification by the Certification Body (CB). Failure to comply with essential requirements is a major non-conformity. To achieve certification, corrective actions shall be implemented within three months from the date of assessment of non-conformities. The company under audit shall provide the CB with satisfactory evidence of correction of all major non-conformities, if necessary, with additional audits.

**Important Requirements:** Failure to comply with important requirements is a minor non-conformity. To achieve certification, the company under audit shall first propose a corrective action plan within maximum three weeks from the date of assessment of the non-conformities - to the satisfaction of the CB. In the proposal, the company under audit shall include the timeframe for the implementation of each corrective action, considering that all minor non-conformities must be closed before the surveillance audit. The proposal shall be analysed by the CB regarding its consistency and feasibility. If accepted, the certificate can be granted. Then, in the surveillance audit, the company under audit shall be able to demonstrate that all minor non-conformities reported in the approved proposal were solved. If the approved proposal has not been fully implemented, the certificate is suspended until the resolution of any remaining minor non-conformities.

**Recommendations:** It is not compulsory for the company under audit to comply with recommendations to achieve certification. Nonetheless, compliance with recommendations shall be verified during the audit and any non-conformities shall be highlighted in the audit report as a "recommendation". The company under audit shall inform the CB, during the following audit, regarding any corrective measures implemented.

Requirements that are not applicable to the audited unit of certification will be marked with "N.A."
